ABOUT ME

Electrical Engineering undergraduate at Telkom University with a 3.68 GPA and internship experience at PT Hariff Dipa Persada and PLN UP3 Bandung. Skilled in circuit analysis, simulation, wiring verification, and power distribution operations, with proficiency in AutoCAD, Proteus, FluidSIM, and Simurelay. Interested in power systems, oil & gas, mining, and heavy-current electrical industries.

EDUCATION

Universitas Telkom

September 2024 – Present

S1 Teknik Elektro | GPA : 3,68 / 4,00 | [\[Academic Transcript\]](#)

WORK EXPERIENCE

PT Hariff Dipa Persada

August 2026 – Present

Quality Control Engineer Intern

- Support quality inspection and functional testing of electronic and integrated systems to verify product performance against established specifications.
- Conduct system testing and troubleshooting, including Battlefield Management System (BMS) verification covering communication, data exchange, navigation, and connectivity.
- Document test results, inspection findings, and identified issues to support quality evaluation and corrective actions.

PT PLN UP3 Bandung

June – July 2026

Network Engineering Intern

- Participated in SUTM maintenance with the PDKB team, including jumper disconnection/reconnection and insulator replacement for preventive maintenance.
- Studied distribution system operations through SLDs for substations, switching stations, and distribution substations, including dispatcher–field technician coordination during planned network switching.

PT Hariff Dipa Persada

January – February 2026

Manufacturing Engineering Intern

- Conducting analysis and simulation of electrical circuits and control systems using FluidSIM, Proteus, and Simurelay to support the prototype development process.
- Verifying wiring, cable harnesses, and component placement on at least three prototype units, ensuring compliance with technical schematics.
- Designing residential electrical installation layouts using AutoCAD, covering cable routing, load distribution, and distribution panels.

PROJECTS

Automatic Fire Detection & Extinguishing System

April – June 2026

Team Project – Electrical Engineering

- Designed and tested an automatic fire detection and extinguishing prototype integrating 2 sensor and 2 actuators with sensor – actuators control logic

Liquid Flow Monitoring & Leak Detection System

April – June 2026

Team Project – Electrical Engineering

- Developed a real-time monitoring prototype using Arduino Uno, YF-S201 flow sensor, and LabVIEW, Integrating leak detection and data visualization through serial communication.

Electro-Pneumatic Control System Design & Simulation

January – February 2026

Engineering Project – PT Hariff Dipa Persada

- Designed and simulated an electro-pneumatic control system using FluidSIM, validating actuator sequences based on control logic.

Residential Electrical Distribution System Design

January – February 2026

Engineering Project – PT Hariff Dipa Persada

- Designed residential electrical installation layouts using AutoCAD, including load distribution, cable routing, and basic distribution panels.

24V DC Relay & Timer-Based Lighting Control

January – February 2026

Engineering Project – PT Hariff Dipa Persada

- Designed and simulated a 24V DC lighting control circuit using relay and timer components to verify operating sequences.

LEADERSHIP EXPERIENCE

Keluarga Mahasiswa Teknik Elektro, Telkom University

April 2026 – Present

Assistant Lecturer

- Developed learning materials and guided first-year students through the Electrical Engineering matriculation program.

Institute of Electrical and Electronics Engineer, Telkom University

November 2025 – Present

Research & Development Staff

- Promoted 20+ competitions monthly and supported internal competitions, contributing to a 25% increase in member participation.

Society of Renewable Energy, Telkom University

November 2025 – Present

Research Staff

- Participated in discussions, research, and technical skill development related to system reliability, monitoring, and energy technology.

SKILL

Languages : Indonesian (Native) | English (Intermediate).

Core Competencies : Electrical Engineering | Power Distribution Systems | Electrical Testing & Measurement | Quality Control & Inspection | Electrical Wiring & Installation | Troubleshooting | Technical Analysis | AutoCAD | Electrical Simulation.

Technical : AutoCAD | Proteus | FluidSIM | Simurelay | LabVIEW | MATLAB/Simulink | Arduino IDE | Tinkercad | Fusion 360 | Canva.

Interests : Power Systems | Electrical Maintenance | Industrial Electrical Systems | Oil & Gas | Mining & Heavy Industry.

Activities

- **Head of Security Division – SRE Essay Event, Telkom University** | Bandung, Indonesia | November 2025.
- **Theater Talent – IEEE Promotion Event, Telkom University** | Bandung, Indonesia | September 2025.
- **Volunteer – Telkom University Padel Charity 2025** | Bandung, Indonesia | October 2025.
- **Profile Video Talent – Telkom University Endowment Fund** | Bandung, Indonesia | November 2025.
